## Professional Experience

### Front-end Developer – Accenture | E-commerce Platform & Meta Project

02/2025 – present

- Developed customer-facing **React** features and reusable UI components
- Integrated **REST APIs** and optimised performance of existing features
- Collaborated within a cross-functional **Agile** team (backend, design, QA)
- Contributed to a short-term **Meta** project delivering UI for email campaign templates

### Front-end Developer – Soft Produkt | High-Frequency Forex Trading App

07/2023 – 11/2023

- Independently built the full front-end (**JavaScript + Sass**) of a trading web application
- Designed and implemented custom **UI components** tailored to client requirements
- Delivered **complex data tables** and integrated **real-time views** with backend APIs

### Front-end Developer – Skill & Chill | Internal Banking System (*Banking Clients*)

08/2022 – 02/2025

- Delivered new front-end features and enhanced existing UI in a small web dev team
- Developed reusable **React** components for internal banking tools managing **large volumes of financial data**
- Resolved **100+ UI issues**, modernised layouts and introduced reusable widgets aligned with **accessibility standards**
- Built **multi-step workflows** and **data-intensive screens** for banking operations
- Developed an internal **chat feature (PoC)** as an additional module
- Acted as the **main front-end contact** with stakeholders on visual and functional requirements

---

## Tech Stack

**Front-end:** React, TypeScript, JavaScript, Next.js, React Native, **Redux**, Tailwind CSS, Sass, HTML/CSS, **RWD**

**Back-end & Data:** REST API, GraphQL, SQL, Node.js (basics), Supabase

**Tools & Workflow:** Version Control: **Git** (GitHub, GitLab), CI/CD, **Agile/Scrum**, Figma, SEO & Accessibility

**Other (academic / project use):** C++, Java, MySQL (basics), PostgreSQL (basics)

---

## Selected Projects

### Clanya – React Native, TypeScript, Expo, Tailwind, Supabase

Full-stack mobile app for **household management** (tasks, shopping lists, events, polls) with **authentication**, **collaborative features** and **real-time updates** — showcasing both front-end and back-end skills. In progress.

### Movies Browser – React, JavaScript, Redux, REST API

Responsive **movie discovery app** allowing browsing, searching and filtering via public API.

### 2D Adventure Game – C++, SFML

Personal project inspired by The Binding of Isaac; **dungeon crawler** with **combat**, **enemy hierarchy**, **collision detection** and **FPS counter**.

---

## Education

**Polish-Japanese Academy of Information Technology** – BSc in Computer Science (2023 – expected graduation: 2027)

**YouCode Bootcamp** – Front-end Development (2021 – 2022)

**Languages** – Polish (Native), English (B2)
