Tech Stack

React • TypeScript/ JavaScript • Tailwind CSS • REST API • React Native • Next.js • GraphQL • HTML / CSS • Sass • Git • GitHub • SQL • C++ • Java

Experience

Front-end Developer – Accenture | E-commerce Platform & Meta Project

02/2025 – present

- Developing customer-facing React features and reusable UI components
- Integrating REST APIs and optimising performance of existing modules
- Collaborating in a cross-functional agile team
- Contributed to a short-term front-end project for Meta focused on UI delivery for email campaign templates (*using internal tooling*)

Front-end Developer - Soft Produkt | High-Frequency Forex Trading App

07/2023 – 11/2023

- Independently built the full front-end (JavaScript + SASS) of the web application
- Designed custom UI components based on specific client requirements
- Implemented complex data tables and integrated views with back-end APIs

Front-end Developer - Skill & Chill | Internal Banking System (*Banking Clients*)

08/2022 – 02/2025

- Delivered front-end features and UI enhancements as part of a small web development team
 - Identified and resolved numerous UI issues, modernised layouts and implemented reusable widgets and accessibility standards
 - Developed new data-intensive screens and multi-step flows based on detailed client requirements
 - Built an internal chat feature as an additional module (*PoC*)
 - Acted as the main front-end contact for communication with banking stakeholders regarding visual and functional requirements
-

Selected Projects

Clanya - React Native, TypeScript, Expo, Tailwind, Supabase, Auth

Mobile app for managing shared households: users can create households, add members, assign tasks, shopping lists, events and polls - giving full control over everyday home responsibilities “in one place and always at hand”, connected to a backend with authentication and real-time updates, in progres.

Movies Browser - React, JavaScript, Redux, REST API

Responsive movie discovery app that fetches data from a public movie API and allows browsing, searching and filtering by category.

2D Adventure Game - C++, SFML

Personal project inspired by The Binding of Isaac; a 2D dungeon crawler with real-time combat, enemy hierarchy, collision detection and FPS counter.

Education

Polish-Japanese Academy of Information Technology - BSc in Computer Science (2023 – 2027)

YouCode - Front-end Bootcamp (2021 – 2022)

Languages - Polish (*native*), English (**B2**)
