Over 3 years of professional experience.

Research Experience

Front-end Developer React, Accenture
February 2025 – Present

- Developing user-friendly web applications using modern technologies.
- My responsibilities include building responsive UI components, optimizing performance, and collaborating with backend developers, UX designers, and business analysts to deliver high-quality digital solutions.
- My work allows me to participate in large-scale projects, leverage cloud platforms, and stay up-to-date with the latest industry trends.

Front-end Developer, SKILL AND CHILL
Project: Internal Banking System
August 2022 – February 2025

- Delivered high-quality visual aesthetics for the system.
- Fixed interface errors and glitches.
- Developed new components, screens, and integrated database queries.
- Implemented real-time group chat interface with chatbot integration.

Front-end Developer, SoftProdukt
Short-term project: Forex High-Frequency Trading Application (references available upon request)
July 2023 – November 2023

- Designed an intuitive UX layout for the application.
- Developed reusable components and enhanced functionality with scripts.
- Integrated Django, HTMX, JavaScript, and Sass seamlessly.
